

Study First Platform

Functional Architecture

Core Workflows, Counselor Desks, Dual-Track Engagement, and Automation System
Specifications

Counselor & Appointment Engine

A smart, routed consultation ecosystem connecting prospective students with destination-specialist counselors.

Counselor Directory & Booking

Public Counselor Directory

A dedicated portal showcase displaying verified counselor profiles. Each profile highlights specialized target countries, years of advisory experience, academic credentials, and historical student visa success rates.

Direct Appointment Request

Integrated calendar booking directly on counselor profiles. Allows onboarding or logged-in students to pick preferred consultation dates and times, submitting immediate booking requests.

Evaluation Desk Workflow

Real-Time Lead Assessment

Incoming requests pop up in the assigned counselor dashboard with instant notifications.

Before confirming, counselors audit the applicant's complete profile—including SSC/HSC GPA, IELTS/TOEFL scores, target country choice, and financial budget.

Match & Reassignment Protocols

Option A: Approved Match

When applicant criteria align with target country standards, the counselor accepts the appointment. The system auto-generates multi-channel SMS and Email confirmations with calendar invites.

Option B: Ineligible & Smart Transfer

If gap criteria exist, the counselor sends structured feedback and suggests suitable alternative countries. Upon user consent, the lead automatically transfers to a destination-specialist counselor desk.

Dual-Track Engagement System

Agency-Assisted Track

Full-service guided counseling for students seeking complete end-to-end support with university applications, document processing, fee payments, and visa filings under an assigned counselor.

Self-Applicant Track (DIY Hub)

Tailored hub for independent students. Includes interactive Statement of Purpose (SoP) / LoR builders, document readiness audit checklists, and step-by-step application timelines.

Merit Scholarship Waiver

100%

Service Fee Waiver

Automated High-Achiever Engine

The platform should automatically flag high-performing applicants based on academic credentials (e.g., dual A+ in SSC & HSC or top-tier GPA equivalents).

Qualified meritorious students receive an automatic 100% agency service fee waiver.

Admins can verify transcripts in the backend and approve digital waiver badges or discount codes.

Events Management & Pop-Ups

Central Event Hub

Categorized into Upcoming Events (live schedules & registration), Ongoing Events (real-time streams), and Past Event archives with recaps and photos.

Dynamic Pop-Up Modals

Configurable website modals alert visitors to upcoming university expos, virtual counseling sessions, and scholarship seminars.

Admin Event Control

Comprehensive admin tools to create events, set target audience rules, control pop-up trigger timings, and manage attendee registration lists.

Multi-Role Dashboard Matrix

Dashboard Role	Primary Features & Capabilities	Core Operational Focus
User Dashboard	Academic profile setup, DIY vs Agency mode toggle, appointment tracking, transfer approvals.	Application Tracking & Self-Service
Counselor Desk	Assigned leads queue, profile fit evaluation desk, eligibility feedback, country reassignment tools.	Lead Assessment & Student Advisory
Admin Panel	Global pipeline overview, manual lead transfers, transcript verification, scholarship approvals, filters.	System Oversight & Staff Management

SMS & Email Automation Engine

Transactional & Bulk SMS

Instant direct messaging and predefined templates for booking alerts. Supports bulk group SMS broadcasting with scheduled delivery.

HTML Email Builder

Ready-to-use email layouts plus an admin template builder for transaction updates, event invitations, and marketing outreach.

Targeted Personalization

Filter campaigns by target country, scholarship status, or DIY track with dynamic tags like {First_Name} and {Assigned_Counselor}.
