Our Twin Conversion Pillars

Structure: The IDP Benchmark

IDP excels because it removes cognitive load immediately. Our homepage follows this layout strictly by implementing clear, segmentable menus, simple global search tools, and direct visual call-outs for visa pathways.

Value Gain: Avoids messy, confusing text catalogs that overwhelm young students looking for immediate clarity.

Trust: The Abroad Inquiry Factor

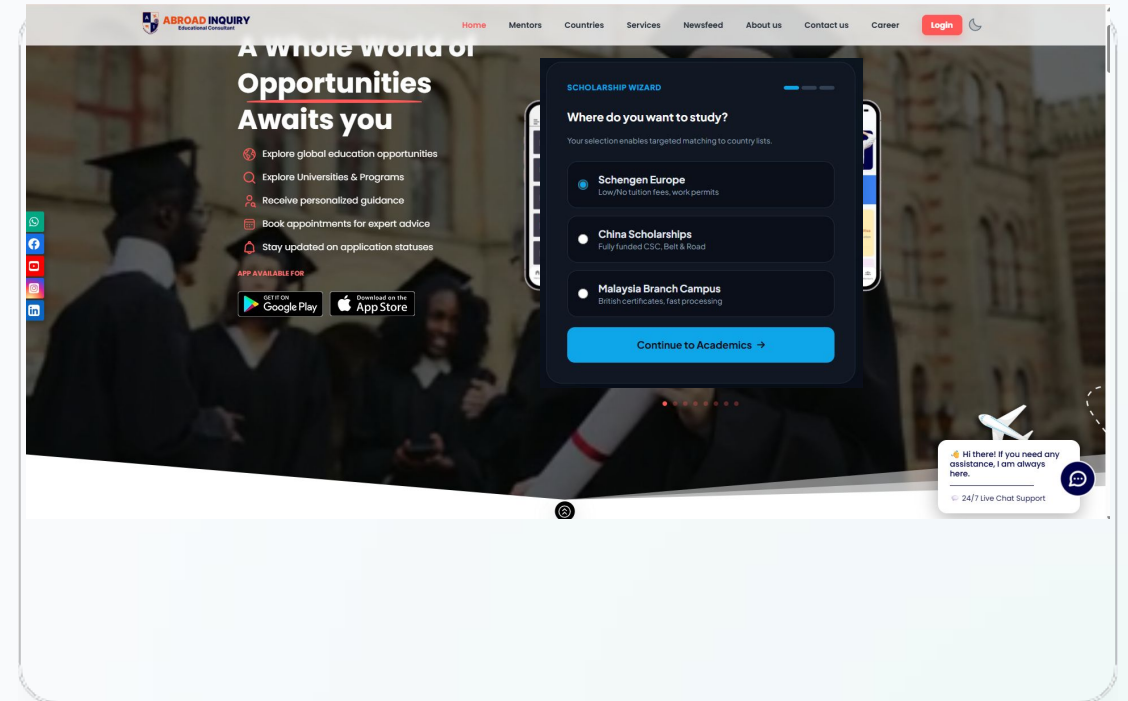

Abroad Inquiry captures a massive share of the Bangladeshi student demographic because they leverage organic peer communities. Our layout puts verified Bangladeshi student success profiles right on the front page.

Value Gain: High trust mitigates the general skepticism students have toward consultancy claims.

Hero Section **Layout Architecture**

The first screen visual must establish high-trust authority within 3 seconds, borrowing layout structural success from IDP.

-  **Value Prop Headline:** "Study in Europe, China & Malaysia with Zero Upfront Cost Guarantees"
-  **Micro-form Panel:** An interactive inline dropdown: [Where to Study] -> [Degree Goal] -> [Next step].
-  **Visual Proof:** Floating banners indicating "100% Visa Success Guarantee Scheme."

What is **Micro form Panel**?
